EXPÉRIENCE

F*** This Job : Graduation project 11

First-person shooter :

Team of 24 people

I designed the shooting system and interaction designs, and the 3Cs, while also handling the entire Level Design.

Splinter Cell Prototype : Personal Project 11

Third-person stealth game :

I designed a brightness detection mechanic by leveraging Unreal Engine's lighting system.

TikiVolcano : Personal Project 11

Third-person platformer :

Development of a Hub creation tool (Warp Room style) and implementation of an overall progression save system.

Enviro Storytelling Exercise : ARTFX Project 11

First-person horror game :

Established the 3Cs and Level Design, while maintaining constant communication of intentions for each room with the art team.

Heart of Darkness Remake : ARTFX Project 11

Third-person platformer :

Team of 15 people

I handled the Level Design, worked on mechanics design and the 3Cs, and also produced the cinematics.

The project was later reviewed by **Éric Chahi**.

EDUCATION

ARTFX Montpellier, digital art school :
